

How wet can Bee wett

Apple Bee furniture is made of the highest quality materials. The same certainly applies to the cushions. Our BEE WETT range consists of special weather-resistant cushions that you can simply leave outside. The removable cover is made of the best possible materials, which are all washable. As well as being waterproof, the material is also guaranteed to be UV-resistant. Unlike normal foam, the unique BEE WETT filling does not absorb moisture. The open fabric structure on the bottom of the cushion drains all moisture perfectly. This ensures that your BEE WETT cushion dries incredibly quickly compared to other cushions. The Bee Wett cushion is upholstered with a Olefin material that is resistant to rot and fungus, but is also UV-proof, soft, comfortable and damp-proof.

Care

For many years we have been supplying Apple Bee furniture together with the highest-quality, care-friendly BEE WETT cushions. One of the surest ways to extend the life of these attractive cushions is to maintain the fabric correctly. This can be done simply by brushing off dirt before it becomes embedded in the fabric fibres and to immediately remove spilled liquids and other substances. Do not use any caustic cleaning agents or chlorine. You can leave the cushion covers to soak in a soap and water solution and/or wash them in a delicate fabrics programme at a maximum of 30 degrees. NB: always rinse out the covers thoroughly!

In order to retain the cushions' water-repellent layer you can add a little Harmisol or similar to the last rinsing. Do not put the cushion covers in a spin dryer or dryer and do not iron them. As soon as the washing machine programme is finished, immediately replace the wet cover around the cushion filling so that the natural elasticity of the fibres will pull the cover nice and tight around the filling as it dries.
